

Stéphane Ghozzi

I am a data scientist at the World Health Organization. I help conceive, set up and run data-science projects, including: domain research; mathematics, statistics and machine learning; data processing, exploration and visualization. I facilitate and deliver reports and concept notes, code notebooks and packages, interactive graphics.

Graduate from the École normale supérieure, physics PhD, professional work in theoretical physics, infectious-disease surveillance and epidemiology. Fluent in English, French and German. He/him.

Experience

Data scientist World Health Organization (WHO)

May 25, 2023 – present · 2 yrs 1 mo

Berlin, Germany

WHO Hub for Pandemic and Epidemic Intelligence

pandemichub.who.int

International Pathogen Surveillance Network (IPSN)

who.int/initiatives/international-pathogen-surveillance-network

- member of the team leading global efforts towards making pathogen genomic surveillance data infrastructure, analysis, and sharing more accessible, equitable, and sustainable
- stakeholder engagement, meeting preparation, output synthesis, technological advancements and research monitoring, to formulate a work plan for the implementation of WHO's Global Genomic Surveillance Strategy

Epidemic Intelligence from Open Sources (EIOS)

who.int/initiatives/eios

- development and implementation of two machine learning and generative AI software and infrastructure projects
- supervision of multidisciplinary teams of developers and business analysts who designed application architectures and built strategies for data querying, data processing and machine learning pipelines (Python), implementation of Large Language Models (OpenAI), web applications (Streamlit, Flask) to interact with the data analysis
- one project was cloud native, with DevOps pipelines automating the code compilation, component deployment, and connection to the necessary cloud services

Prototype for the Surveillance Portfolio Assistant (SPA):

- design, development, implementation, and deployment of a web application for recommending surveillance approaches based on country context and needs
- R package that allows the ingestion of relevant datasets, implements a scoring algorithm, and includes the code for a Shiny web application to interactively set processing parameters, and see and download the results

AI for Public Health Intelligence strategy:

- conception of position papers, engagement with internal leadership and external partners, organisation of internal seminars

Various project lead activities, such as designing work plans, reporting on progress and budget, engaging with stakeholders.

Data scientist Independent developer and consultant

November 1, 2022 – May 24, 2023 · 7 mos

Berlin, Germany

stephaneghozzi.com

Research, statistics, machine learning, data visualization.

**Research
associate**

Helmholtz-Zentrum für Infektionsforschung (HZI)

June 1, 2020 – May 31, 2022 · 2 yrs

Brunswick (Braunschweig), Germany

helmholtz-hzi.de/en/research/research-topics/bacterial-and-viral-pathogens/epidemiology/our-research/ · sormas.org

Senior scientist, statistical methods and tools for public health, in the Epidemiology department (Krause group).

Surveillance Outbreak Response Management and Analysis System (SOR-MAS): Automated support for decision making by SORMAS users. Strategies to bring computations to data so as to allow for advanced analytics without compromising data privacy.

Effect of climate change on infectious disease spread: Statistical modelling of the impact of short and long-term environmental and demographic changes on Lyme disease spread in Germany.
Machine learning for multiplex serology.

Management and organization:

- contact person for topics of automated analyses and processes;
- student support;
- writing of grant applications.

**Research
associate**

Robert-Koch Institut (RKI)

April 15, 2016 – May 31, 2020 · 4 yrs 2 mos

Berlin, Germany

rki.de/signale-project

Machine learning, informatics, statistics and visualizations, Signale team, Department of Infectious-Disease Epidemiology.

Research and development:

- development of outbreak-detection algorithms and modelling of infection dynamics;
- performance evaluation and parameter optimization of the algorithms;
- natural language processing of online articles to support international infectious-disease surveillance;
- interactive visualizations of the results and other data for public-health professionals.

Management and organization:

- speaker for the team (four data scientists, two web developers, an average of two students);
- coordination of the international Topic Group Outbreaks under the Focus Group AI for Health of ITU and WHO: itu.int/en/ITU-T/focusgroups/ai4h/Pages/tg.aspx
- supervision of master theses;
- organization of workshops and hackathons;
- writing of grant applications.

World Health Organization (WHO)

Seconded from RKI

May 1, 2019 – October 31, 2019 · 6 mos

Geneva, Switzerland

who.int/eios · who.int/emergencies/outbreak-toolkit

Machine learning and web-application development for epidemic intelligence and investigation of outbreaks of unknown origins.

In the Detection, Verification and Risk Assessment (DVA) and the Health Operations Monitoring and Data Collection (MDC) units of the Health Emergency Information and Risk Assessment (HIM) department within the WHO Health Emergencies (WHE) program of WHO.

Visual artist

Self employed

March 1, 2012 – April 14, 2016 · 4 yrs 1 mo

Berlin, Germany

Portfolio as of 2014 (pdf): stephaneghozzi.com/docs/portfolio-ghozzi.pdf

Drawing, generative animation, photography, video, computer animation.

Selected projects and collaborations:

- 2014: videos exhibited during the *backup* festival, E-Werk, Weimar;
- 2005: twelve illustrations for *Trace.project*, a compilation album of original electronic music;
- 2005: videography for the dance piece *Entre-Deux* by Mirjam Fruttiger, Paris and Rome (including one-week invitation at the Villa Médicis);
- 2004: videography on the documentary *Manchay Tiempo* by Florence Blum and María Pía Medina-Luna (four-weeks filming in Peru);
- 2002: drawings and photographs published in the magazine *R de réel*.

Postdoctoral researcher

Institut für Theoretische Physik (THP), Universität zu Köln

March 1, 2010 – February 29, 2012 · 2 yrs

Cologne, Germany

www.thp.uni-koeln.de/~lassig

Statistical and mechanical models of biological evolution, in the Lässig group.

Mathematical model and analysis of bacterial growth and gene expression, interpretation of experimental results.

Signatures of selection in DNA sequences and comparison with population genetics models:

- long-term influenza evolution;
- transcription-binding-site motifs in yeast.

Co-evolution signatures in protein sequences.

**Teaching
assistant**

Universität zu Köln

September 1, 2010 – January 30, 2012 · 1 yr 5 mos

Cologne, Germany

Mathematics and statistical physics for Bachelor students.

UPMC Sorbonne Universités

October 1, 2005 – August 31, 2009 · 3 yrs 11 mos

Paris, France

Thermodynamics, optics and waves, mathematical methods for Bachelor students.

**Doctoral
researcher**

Laboratoire de Physique Statistique (LPS), École normale supérieure

September 1, 2005 – December 31, 2009 · 4 yrs 4 mos

Paris, France

www.labos.upmc.fr/ljp/?article7 · www.lps.ens.fr

Theoretical and experimental biophysics, in the Chatenay group: Dynamics of gene regulatory networks.

Time series of gene expression levels, via fluorescent microscopy, of the lysis-lysogeny decision network of the bacteriophage Lambda:

- molecular biology (extraction of viral genes, insertion of genes coding for fluorescent protein, modification of bacterial genomes);
- microbiology (bacterial and viral cultures);
- automation and fluorescent microscopy;
- image analysis.

Mathematical analysis of noise statistics of bacterial gene expression.
Computer simulations of the dynamics and evolution of gene regulatory networks.

Won a 60 k grant to fund the experimental project (over 3 years, used to buy apparatus and consumables): program “Interface physique, biologie et chimie : soutien à la prise de risque 2007-2009” of the CNRS.

**Volunteering
Founding
member**

Celsius

August 1, 2007 – August 31, 2009 · 2 yrs 1 mo

Paris, France

Celsius was a think tank with the goal of developing the European project.

- Elaboration of background documents on technical themes;
- preparation, organization of, and follow-up on, two-days meetings in Madrid, Brussels, and Paris, each with more than 30 participants;
- development of publication strategies, print and online.

Internships	Laboratoire de l'Accélérateur Linéaire (LAL), Université Paris-Sud February 1, 2005 – March 31, 2005 · 2 mos Orsay, France Theoretical particle physics, in the Davier group: Computation of fundamental physical quantities for high energy physics from particle collision experiments data.
	Deutsches Elektronen-Synchrotron (DESY), Humboldt-Universität zu Berlin January 17, 2003 – August 31, 2003 · 7 mos Zeuthen, Germany Theoretical particle physics, in the Jegerlehner group: Analysis of experimental data with ad hoc and first-principle mathematical models of elementary particles.
	Laboratoire Kastler Brossel (LKB), École normale supérieure June 1, 2002 – August 31, 2002 · 3 mos Paris, France Experimental quantum physics, in the Grynberg group: Construction of an optical atom trap.

Education

Certifications	Coursera January 1, 2016 – March 31, 2016 · 3 mos Practical Predictive Analytics: Models and Methods Machine Learning Data Manipulation at Scale: Systems and Algorithms
Ph.D.	École normale supérieure September 1, 2005 – December 31, 2009 · 4 yrs 4 mos Paris, France Theoretical and experimental biophysics: Dynamics of gene regulatory networks. See “Experience” above for details.
B.Sc. & M.Sc.	École normale supérieure September 1, 2001 – August 31, 2005 · 4 yrs Paris, France Theoretical and mathematical physics: specialization in particle physics and statistical physics. Competitive fellowship. Activities and societies: President of the Photography and Video-Making student associations in 2002 and 2003: · presenting, defending, and managing budgets; · initiation and support for members.

M.A. **École nationale supérieure des arts décoratifs**
September 1, 2003 – August 31, 2004 · 1 yr
Paris, France
CGI, 3d animation, post-production.

Skills

Programming	R, Python, LaTeX, Hugo, HTML/CSS/Bootstrap, Mathematica, Matlab, Processing (Java), SQL, Perl, C++, Shell
Tools	Git, Jira, Confluence, Team Foundation Server (agile management: Scrum, Kanban), SQL Server Management Studio, Photoshop, Illustrator, After Effects, Microsoft Office, 3ds Max, Blender
Languages	French (native) German (professional) English (professional) Japanese (basics)

Selected projects

outbreak detection evaluation

a new general approach to evaluating outbreak-detection algorithms implemented in the Python package epi-quark (main developer Auss Abbood)

preprint: medrxiv.org/content/10.1101/2022.03.16.22272469

code: github.com/aauss/epi-quark

eios anomaly

Python notebooks for natural language processing and machine learning to identify epidemiologically relevant texts and support epidemic intelligence

code & motivation: github.com/stephaneghozzi/eios-anomaly

slides (pdf): github.com/stephaneghozzi/eios-anomaly/blob/master/eios_anomaly-seoul-20191113.pdf

sormasdatagen

an R package for generating synthetic data for the outbreak-management software SORMAS

code & motivation: github.com/stephaneghozzi/sormasdatagen

world health organization outbreak toolkit virtual assistant

a prototypical interactive R Shiny web application with analyses and visualizations for the investigation of outbreaks of unknown origins

code & motivation: github.com/stephaneghozzi/wotva

slides (pdf): github.com/stephaneghozzi/wotva/blob/master/doc/outbreak_toolkit-assistant-presentation-20191016-long.pdf

live demo: stephaneghozzi.shinyapps.io/wotva

asmodee trendbreaker evaluation

an R script for evaluating a new outbreak-detection algorithm on simulated and observed Covid-19 time series

paper: doi.org/10.1098/rstb.2020.0266

code: github.com/stephaneghozzi/asmodee-trendbreaker-evaluation

signale logo

Processing scripts to generate patterns used for the graphic identity of a data-science team

code, motivation & output: github.com/stephaneghozzi/signale-logo
